

The
World's
first

TOTALLY
AWESOME

Kid-Led
AI Study

How we did it

12 kids from the US went into a room (the adults said it was called a "FOCUS group"). They asked us to help write a survey about AI. Then we sent it to 800 kids in the US, Germany, South Korea and Australia so we could hear what THEY think.

beep
BOP
BOOP

actually and CURIOUS

We're excited about AI! We've been hearing a LOT about AI lately...
and guess what?

some people think it's scary, and we get that, but we also think
it's awesome!

over half

of us think
AI can help
us learn more,
faster

90% of us

want more
ways to use AI

"Invent a
SUPERSONIC
aeroplane that
can fly very fast!"

SW000000sh!!

14-year-old,
US

"Help deaf
children translate
what others say
into text!"

10-year-old,
South Korea

We have
a lot of
AI ideas!

"EXPLORE SPACE
create COOL
inventions, and
help animals!"

10-year-old,
US

"Translate any
language at all!"

12-year-old,
Australia

hello!
bonjour
pzzz!

The future
looks pretty
COOL
(and FAST!)

"Improve
education and
healthcare"

10-year-old,
Australia

We wanna
use it to do
BIG things!

Like SAVE THE
WORLD! LEVEL

"Reduce
inequality
and help people
understand each
other"

13-year-old,
US

If we could control
AI for a day,

93% of us
would use it to help
others and society
at large

"Help
disadvantaged
people like elderly
people or disabled
people!"

12-year-old,
Australia

"Find solutions
to diseases,
poverty and
homelessness"

11-year-old,
South Korea

~~~~~

# We already know some things about AI!

"Since we grew  
UP with it (AI)  
and we were  
born with it  
around it's  
easier for us to  
get used to it"

12-year-old,  
US

83% of us

use AI to help  
better understand  
a question or  
assignment

76% of us

use AI to get ideas or  
for inspiration/  
brainstorming

84% of us

check if the  
information we get  
from AI is true

# But there's **TONS** still to figure out!

"I feel like there's  
like a lot more to  
learn about AI"

12-year-old,  
US

**89%** of us  
think it's super  
important to learn how to use  
AI safely, understand what  
it's saying, and make  
sure what it tells  
us is true

**54%**  
of us agree  
that AI is  
changing  
our lives, so  
we need to  
learn how to  
navigate it

**43%** of us think  
it's unfair that not  
everyone gets to learn  
about AI at school

**96%**  
of us think it's  
good to have rules  
when using AI

What does  
fair look like?

But there's a  
humongous problem:

Nobody asks us  
what we think

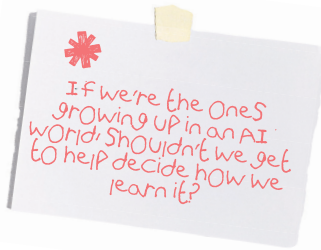

83% of us confirm:  
Adults make ALL the  
decisions about AI at  
school ALLLLL!

Big yikes!

Half of us  
aren't asked for our  
opinions or included in  
conversations about  
how to teach AI \*

65% of us  
feel left out of the  
AI conversation!

So, teachers,  
principals,  
grown ups...

→ We have a proposal  
for you should you  
choose to accept it

And we even  
have some ideas  
on how to make  
a super fun  
class on AI! \*

\* And yikes  
maybe we'll save  
the world????

Let's learn more about  
AI TOGETHER.

We have tons of ideas  
for our school's AI  
Policy that we think  
will help everyone.

Because  
this stuff  
matters to  
all of us
